Part III.

EXAMINER'S REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The present invention of a fuel fill joint and method of making a fuel fill joint is deemed to be an unobvious improvement over the prior art of record such as U.S. patent 6,199,916. There is a spin weld connection between a tube and a funnel portion wherein the tube includes a metallic barrier layer between an inner plastic layer and an outer plastic layer and is inserted into a cylindrical recess of the funnel portion such that the plastic in the recess and the plastic layers of the tube when spin relative to each other form the spin weld connection securing the tube and the funnel portion together. The improvement includes having the outer plastic layer of the tube provided with a shoulder protruding radially outward of a circumference of the outer layer and a second outer protrusion formed on the funnel portion surrounding the cylindrical recess and thereby providing during the assembly of the tube and the funnel portion contact between shoulder protrusion of the tube and the second protrusion of the funnel portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric Nicholson whose telephone number is (703) 308-0829. The examiner can normally be reached on Tuesdays thru Fridays from 7:30 to 6:00.
